

LABORATORY RECORD

Course: Full Stack Web Development

Course Code: 23CM4121

Week No.: 1

Student Name: B.Harsha Vardhan

Roll No.: A24126552075

Date: 30-08-2026

1. TITLE

Design Static Webpage Using HTML Components

2. AIM

To design a static webpage using core HTML components such as headings, text formatting tags, unordered and ordered lists, tabular data, hyperlinks, and interactive form elements.

3. OBJECTIVE

The objectives of this experiment are:

- Learn core HTML structure and text formatting tags.
- Implement structured lists and catalog tables.
- Construct an interactive HTML form.

4. THEORY

HTML provides standard structural tags (h1-h3, p, b, i, u, sup, sub) for formatting text, list elements (ul, ol, li) for grouping items, table structures for tabular data, and form controls for data entry.

5. ALGORITHM / PROCEDURE

1. Create index.html file for TechBook Store.
2. Add headings, paragraphs, and superscript/subscript tags.
3. Create category lists and book catalog table.
4. Add book order form with text, email, and radio inputs.
5. Test in web browser.

6. PROGRAM

index.html

```
<!DOCTYPE html>
<html>
<head>
  <title>TechBook Store - Online Library</title>
</head>
<body>

  <h1>TechBook Digital Library & Store</h1>

  <p>
```

```

    Welcome to <b>TechBook Store</b>. Discover <i>best-selling programming books</i> and
    <u>computer science resources</u>.
</p>

<p>
    Featured Release: JavaScript Core 2<sup>nd</sup> Edition (v3.0<sub>rev</sub>)
</p>

<h2>Book Categories</h2>
<ul>
    <li>Full Stack Web Development</li>
    <li>Artificial Intelligence & Machine Learning</li>
    <li>Cloud Computing & DevOps</li>
</ul>

<h2>Top 3 Bestsellers</h2>
<ol>
    <li>HTML5 & CSS3 Masterclass</li>
    <li>Modern JavaScript ES6+</li>
    <li>Python for Data Science</li>
</ol>

<h2>Available Book Catalog</h2>
<table border="1" cellpadding="6" cellspacing="0">
    <tr>
        <th>Book ID</th>
        <th>Title</th>
        <th>Author</th>
        <th>Price</th>
    </tr>
    <tr>
        <td>BK-101</td>
        <td>Full Stack Web Development</td>
        <td>B.Harsha Vardhan</td>
        <td>₹599</td>
    </tr>
    <tr>
        <td>BK-102</td>
        <td>Mastering ES6 JavaScript</td>
        <td>K. Sai Kiran</td>
        <td>₹450</td>
    </tr>
</table>

<br>
<a href="https://github.com" target="_blank">Explore Sample Code Repositories</a>
<hr>

<h2>Quick Book Order Form</h2>
<form>
    Customer Name: <input type="text" placeholder="Enter name"><br><br>
    Email Address: <input type="email" placeholder="name@email.com"><br><br>
    Format:
    <input type="radio" name="format" value="paperback"> Paperback
    <input type="radio" name="format" value="ebook"> eBook (PDF)
    <br><br>
    <input type="submit" value="Place Order">
</form>
```

```
</body>
</html>
```

7. CODE EXPLANATION

Code / Syntax	Explanation
<h1>.. <h3>< td=""><td>Section headers and titles</td></h3><>	Section headers and titles
<sup>, <sub>	Superscript (edition) and subscript formatting
, ,	Unordered category and ordered bestseller lists
<table>, <tr>, <th>, <td>	Book catalog data table structure
<form>, <input>	Order form inputs (text, email, radio)

8. TEST CASES AND EXECUTION DATA

The experiment was executed with the following test cases to verify functionality:

Test Case	Input / Action	Expected Result	Actual Result	Status
TC-01	Page Load	Render headings, text formatting, and lists	Render headings, text formatting, and lists	Pass
TC-02	Catalog Table	Display 4 columns with book records	Display 4 columns with book records	Pass
TC-03	Order Form	Accept text/email input and radio selection	Accept text/email input and radio selection	Pass

9. OUTPUT

Output 1: Execution Screenshot

10. RESULT

Thus, the experiment for Week 1 (Design Static Webpage Using HTML Components) was successfully executed and verified.
